PROFESSIONAL SUMMARY

Full Stack Developer with experience building and deploying scalable web and desktop applications using React, Node.js, and Python. Proven ability to design RESTful APIs, integrate third-party services, and optimize backend performance. Experienced in delivering end-to-end products with a focus on usability, reliability, and real-world impact.

EDUCATION

B.Tech in Data Science and Engineering
Vignana Bharathi Institute of Technology, Hyderabad
Aug 2022 – June 2026

EXPERIENCE

Freelance Full Stack Developer | Independent Client Projects **Jan 2025 – Present**

Premium Apparel E-Commerce Store

- Developed and deployed a custom Shopify-based e-commerce platform for a premium streetwear brand, focusing on mobile responsiveness and user experience.
- Implemented custom storefront functionality, product management workflows, and branded UI components aligned with business requirements.
- Collaborated directly with stakeholders to translate design concepts into a production-ready online store.

Progress Tracker – SaaS Productivity Platform

- Engineered a full-stack productivity management application using React, Next.js, Supabase, and PostgreSQL.
- Built authentication, progress analytics, task tracking, and dashboard modules to support productivity monitoring.
- Designed scalable database architecture and backend services to support future feature expansion and multi-user functionality.

PROJECTS

ML Model Monitoring Platform | Python, Flask, Plotly **2025**

- Developed backend services to monitor deployed machine learning models and visualize system health metrics through interactive dashboards.
- Designed APIs and data pipelines to track model performance indicators including Kolmogorov-Smirnov and PSI drift detection.
- Built real-time Plotly dashboards for monitoring model behavior in production environments with retraining recommendation logic.

SimplHome – AI Voice Assistant | React, Node.js, OpenAI APIs **2025**

- Built backend services and API integrations for a multilingual AI-powered voice assistant supporting real-time speech-to-text and NLP processing.
- Designed RESTful APIs to automate customer support workflows, reducing average issue resolution time from 8 minutes to 3 minutes.
- Implemented logging and monitoring to analyze system usage patterns across three languages with comprehensive query distribution analytics.

ProjectPluse – Project Management Platform | Next.js, TypeScript, React **2025**

- Built full-stack project management platform with real-time health scoring, team assignments, and stakeholder dashboards for comprehensive project oversight.
- Developed weekly progress tracking, risk reporting, and confidence level monitoring with seamless employee-client feedback loops.
- Implemented satisfaction ratings, issue flagging, and visual status indicators (Healthy/Yellow/Red) to ensure project success and transparency.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, Flask, FastAPI, RESTful APIs
Databases: PostgreSQL, MySQL, MongoDB, Supabase, SQLite
DevOps & Deployment: Docker, AWS, Vercel, CI/CD, GitHub Actions
Programming Languages: Python, JavaScript, TypeScript, C++
Tools: Git, GitHub, Postman, VS Code, Jupyter
